## SUMMARY

---

Software Developer at PT Pos Indonesia specializing in **front-end & mobile** (React, Flutter, Laravel). Delivers maintainable features, responsive UIs, and measurable performance improvements with strong collaboration and a bias to ship.

## EDUCATION

---

### Syiah Kuala University – Aceh, Indonesia | August 2018 – September 2022

Undergraduate of Math and Science, Computer Science; Current GPA: 3.77/4.0

## PROFESSIONAL EXPERIENCE

---

### PT Pos Indonesia - Software Developer (Front-end/Mobile) | Aug 2023 – Present

- Build and ship web & mobile features with **React, Flutter, Laravel/PHP, CodeIgniter** end-to-end (scoping → implementation → testing → release).
- Componentized UI (30+ reusable components) & applied code-splitting/lazy loading to improve load performance.
- Implemented role-based access and multi-step forms, collaborated with design/product, maintained CI/CD and code reviews

### Digitalent Scholarship (Cisco) - Assistant, “Big Data Using Python” | Jul–Sep 2022

- Supported ~25 students in Python & basic big-data concepts; prepared practice materials and weekly clinics.  
Certificate: [certificate](#)

### Syiah Kuala University - Lab Assistant (Data Visualization, Machine Learning, Big Data) | Sep 2021 – May 2022

- Facilitated practical sessions (Python, matplotlib/seaborn, Tableau; ML basics such as KNN/Naive Bayes/Decision Tree).
- Guided 20–60 students per class; created tutorials and assisted assessments.

### Kampus Merdeka - Assistant, Microcredential Artificial Intelligence | Nov–Dec 2021

Assisted 30 students with Python fundamentals and introductory AI/visualization.

Certificate: [certificate](#)

### Rakamin Academy - Project-Based Intern, Big Data Analytics (Kimia Farma) | Oct 2022

- Completed a virtual project simulation; delivered assignment milestones.  
Certificate: [certificate](#)
- 

## ORGANIZATION

---

- Secretary of the ministry of religion, executive student council Syiah Kuala University 2020/2021
- Staff of PPM department, informatics student association Syiah Kuala University 2021/2022
- Head of IT division, Election Commission Syiah Kuala University 2021

## PROJECT

---

### **JobMaster – Internal Career & Job Evaluation System** | September 2025 - Present

- Build & maintain front end (job profile, evaluation, org structure) with reusable components & form patterns.
- Iterate UX with HR & backend; continuous UI enhancements and accessibility improvements.
- *Internal product • Private (NDA)*.

### **TemuHobi – Sports & Hobby Community Platform** | February 2025 - Present

- Front-end for discovery, partner matching, and field booking with responsive UI & state management.
- Implemented navigation, listing & booking flows; ongoing feature iterations under Indigo mentorship.
- *Startup project • In development*.

### **Livie – Internal Super App for Employees** | July 2024 - Present

- Continued Android app and **bootstrapped iOS from scratch** with consistent design & performance.
- Shipped attendance (check-in/out) and HR service modules; collaborated closely with backend for releases.
- *Internal product • Private (NDA)*.

### **SIMTKK – Contract Workforce Management System** | July 2024 - Present

- Front end for **contract hiring workflows**: vacancy listing → application → status tracking; admin review dashboard.
- Integrated regional data flows with backend; ongoing module improvements.
- *Internal product • Private (NDA)*.

### **Recruitment Website Pos Indonesia** | November 2024

- Delivered a **public hiring portal** in ~2 weeks: landing, job listings, application form, notifications;
- Simplified the application journey to reduce drop-offs and support nationwide recruitment.
- *Internal product • Private (NDA)*.

### **SiPendi – Early Retirement Management System** | Juny - July 2024

- Implemented **role-based workflow** and a multi-step **form wizard** with reusable form components.
- Reduced manual steps and improved review throughput for operations.
- *Internal product • Private (NDA)*.

### **Explora - Knowledge Management System (KMS)** | January – June 2024

- Built **30+ reusable UI components**, routing, and an event module (submission & leaderboard).
- Applied code-splitting and asset optimization to improve load time and UX.
- *Internal product • Private (NDA)*.

## ADDITIONAL

---

### **Technical Skills**

- Front-end: React, TypeScript/JavaScript, Next.js/Vite, React Native, Flutter
- UI: Tailwind CSS, Material UI (MUI), Bootstrap
- Mobile: Flutter (Dart) (and React Native if applicable)
- Backend for FE: Laravel/PHP basics, JSON, basic SQL
- Performance & DX: code-splitting, lazy loading, Lighthouse/Web Vitals, bundle optimization
- Tools & Ops: Git/GitLab/GitHub, Docker (basic), Figma (dev handoff), Apidog, DBeaver, Android Studio, XCode
